Urban lights – classic, timeless, functional

Innovation and Curiosity are Strong Partners

Light - from innovative technology, in trend-setting design and execution in high reference quality is the focus of our thoughts and actions. We harmonize economic and ecological aspects. The added value for our customers lies in the combination of service and technical implementation.

We advise and develop solutions for energy-efficient, long-lasting and sustainable lighting worlds in cooperation with our customers and partners.

LED technology opens up completely new possibilities for efficiently designing lighting situations. Their economy and service life are convincingly good and we are also constantly improving them.

Our outdoor lighting series are the combinations of classic, lantern shaped luminaire of a contemporary type, to street lights in functional design, equipped with innovative LED technology and outstanding technical characteristicp.

All street lighting series can be set individually and as required using the microprocessor-controlled LED operating electronics and comply with DIN EN 13201, so that street lighting that conforms to standards is guaranteed.
